### MEETING BACKGROUND

This annual in-person meeting of the California Ocean Observing System's Joint Strategic Advisory Committee (JSAC) provides a forum for important stakeholder input that focuses our efforts regarding ocean observing needs. This year's meeting will focus on observations to support marine industry and coordinate coastal ocean uses. Participants will provide the insight and user perspective on technical, economic, legislative, and political matters affecting ocean observing in California. JSAC members are also invited to join the CeNCOOS Science Impact Meeting on the following day, Thursday, Nov. 15, to learn about advancement in coastal and ocean observing in central and northern California.

### MEETING OBJECTIVES

- Communicate and learn about industry and related decision-making needs for ocean and coastal observing.
- guide California's OOS prioritization and coordination efforts.
- Share expert advice and provide insights on key decision-support requirements for ocean and coastal observing.
- Identify new key partners to gather information to guide future activities.
